Description

Gigalight's ACC(Active Copper Cable) assembly series product provide superior signal integrity performance and reliability, comparing to PCC and AOC, ACC is a re-drive solution which built-in linear equalizer to compensate transmission loss, it is an effective solution with low power, low latency, low cost to help high-speed data centers even AI high-computational applications.

Gigalight's GOS-2OA801-XXC cable connects data signals from each of the 16 pairs on the single OSFP end to the dual OSFP ends, each pair operates at data rates of up to 100Gb/s and can be adaptive downward compatibility. The product operates 3.3V power supply and comply with OSFP-MSA and IEEE802.3ck ,it's high performance & cost effective I/O solutions for LAN, HPC and SAN.

The height of OSFP CTHS (Close Top Heat Sink) is fully compliant with OSFP finned top, OSFP RHS(Riding Heat Sink) also can be called flat top, it's a little bit lower than OSFP CTHS.
